yanqing.liu2@dukekunshan.edu.cn · linkedin.com/in/yanqing-liu-rose · github.com/BlueRosy

EDUCATION

University of New South Wales

Sydney, Australia | 2025 – 2026

M.S. in Information Technology

Coursework: Interactive Design, Data Structure and Algorithm, Web Front-End Programming

GPA: 90.333/100, High Distinction

Columbia University

New York, USA | 2021 – 2023

M.S. in Applied Analytics

Coursework: Research Design, Storytelling with Data, Applied Analytics in the Organizational Context, Applied Analytics Frameworks and Methods, Applied Text and Natural Language Analytics

GPA: 4.132/4.3

Macau University of Science and Technology

Macau, China | 2016 – 2020

Bachelor of Applied Economics | Major GPA: 3.86/4.0 | Rank: 2/882 students in the School of Business

Coursework: Advanced Mathematics, Linear Algebra, Statistics, Behavioral Economics, Game Theory

RESEARCH EXPERIENCE

Research Fellow — Hybrid Interactive Intelligence (HII) Lab, Duke Kunshan University

02/2026 – 02/2027

Advisor: Prof. Yucheng Jin | Project: Mindful-Scroll

Lead Mindful-Scroll: link short-form video use to wellbeing states via evening self-reflection dialogues and micro-interaction logs, then design context/signal-aware self-reflection interventions.

- Independently designed and built Mindful-Scroll (React/JavaScript, Dockerized Aliyun): a simulated Douyin-style platform coupling fine-grained interaction logs with daily self-reports and evening reflective dialogue.
- Conversation-log track (current focus): seed topics -> GPT-4-assisted seed-level topic modeling -> human validation of levels/topics -> classifier -> human audit to improve the classifier -> exploratory analysis, pattern/path mining -> between- and within-group longitudinal modeling. Contributions: reflective-dialogue dataset and end-to-end analysis pipeline.
- Conducted a pilot study (N=32) that identified a four-trace high stress/anxiety usage cluster, informing modeling and later intervention targeting.
- Behavioral-log track (in parallel): model short-form video micro-interactions as everyday wellbeing-state signals, with stress and anxiety as key outcomes.
- Intervention track: design context/signal-aware self-reflection support for healthier short-form video use under high stress/anxiety (targeting CHI 2027).
- Venues: presented at DMH 2026; preparing IP&MC dataset/pipeline manuscript (Jul 31) and DMH Conference Book chapter (Aug 31); targeting CHI 2027 for the intervention paper.

Summer Research Intern — Studio for Narrative Spaces, City University of Hong Kong

06/2026 – 08/2026

Advisor: Ray LC | Project: Misinformation Sharing

Explore platform design mechanisms that shape how people report and respond to misinformation on social media.

- Lead study-web layout and front-end development for a simulated social platform supporting an A/B behavioral experiment (treatment vs. control comment conditions).
- Contribute to stimulus curation (authentic vs. misleading-but-funny posts and comments); measures include repost, share, report, and skip.
- Data collection in progress; co-authoring a manuscript targeting CHI 2027.

Research Intern — Pervasive HCI Group, Tsinghua University

12/2025 – Present

Advisor: Dr. Jie Cai | Projects: CoSim; HarmonyOS Developer Forum (exploratory)

CoSim

Investigated how Fudaoyuan's conversational strategies affect distressed students' emotional and interactional responses in Chinese university settings.

- Analyzed dialogue logs from CoSim, an LLM-mediated practice environment for university peer supporters engaging with simulated distressed students.
- Built a trajectory-thematic pipeline across 10 supporters and 19 sessions to trace emotion, self-disclosure, and resistance across turns and contrast facilitative versus hindering sessions.
- Identified four facilitative and five hindering communication patterns, surfacing supporters' blind spots in emotionally sensitive conversations and informing simulation-based feedback design.
- Study completed; co-authoring a manuscript for the next suitable venue.

HarmonyOS Developer Forum (Exploratory)

Exploring help-seeking and tooling discourse in the Huawei HarmonyOS developer Q&A community to select research-ready themes.

- Designing a crawl and topic-modeling pipeline over forum posts and comments, with explicit topic mapping informed by open-source developer and support/tool community literature.
- Topic selection underway (candidates include help-seeking, tooling/bots, IoT, and automotive); no publication claim yet.

Independent Researcher — Data Analysis Course Project, Columbia University

2022 Spring

Instructor: Prof. Kitty Kay Chan

- Analyzed 200,000+ Yelp restaurant reviews using text mining, bigram analysis, sentiment scoring, and decision tree modeling to identify pandemic-related themes and their relationship with restaurant review ratings.

Independent Researcher — Capstone Project, Columbia University

2022 Fall

Instructor: Prof. Cesar Koirala | Industry Partner: Sandler Training Company

- Analyzed 479 surveys using clustering, classification, and random forest models to identify drivers of user satisfaction and ROI; found reinforcement effectiveness and engagement duration as key factors.
- Evaluated survey instrument design, surfaced methodological limitations, and developed a revenue-growth-sentiment segmentation framework to identify high-value user groups.

PUBLICATIONS & PRESENTATIONS

Liu, Y. "Mindful-Scroll: Linking Interaction Logs to Self-Reported Mental Health and Well-Being, and In-App Interventions." Digital Mental Health International Conference (DMH), Hong Kong, June 2026. [Presentation]

Liu, Y., Zhu, Y., & Jin, Y. "Evening Self-Reflection Dialogues on Short-Form Video Use: A Dataset and Modeling Pipeline for Stress and Anxiety Signals." Information Processing & Management Conference (IP&MC) 2026 (Dataset & Full Paper). [In Preparation]

Liu, Y., Zhu, Y., & Jin, Y. "Short-Form Video Micro-Interactions as Everyday Stress and Anxiety Signals: Modeling Behavioral Traces for Digital Mental Health." DMH Conference Book - Maximising the Real-World Potential of Digital Mental Health (Springer Nature). [In Preparation]

Liu, Y., Zhu, Y., & Jin, Y. "Designing Self-Reflection Interventions for Healthier Short-Form Video Use Under High Stress and Anxiety." CHI 2027 (Full Paper). [Target Venue]

Liu, Y., & LC, R. "Comment Conditions and Behavioral Responses to Authentic vs. Misleading Posts on a Simulated Social Platform." CHI 2027 (Full Paper). [Target Venue]

Deng, W., Liu, Y., Chen, Y., Zhang, H., Li, Y., Mi, H., & Yu, C. "CoSim: Identifying Communication Patterns and Skill Development for Fudao Yuan in Chinese Universities." [In Preparation]

WORK EXPERIENCE

Frontend Developer Intern — Beijing Puppy Agent Technology Co., Ltd.

08/2024 – 12/2024

- Led frontend development of an enterprise RAG-based workflow platform, designing a hybrid ReactFlow state management architecture that cut workflow creation time from 2 hours to 30 minutes.
- Built a specialized node framework with automated edge generation and integrated Monaco Editor with custom rich-text components, improving platform reliability and editing experience.

SKILLS

Technical: Python • R • SQL • HTML • CSS • JavaScript • React • Tailwind CSS • Docker • MATLAB • STATA • Figma

Research: Topic modeling • LLM-assisted annotation • Conversational / behavioral log analysis • Longitudinal & predictive modeling • Intervention design • Experiment design

AWARDS & HONORS

Australia's Global University Award

2025

Dean's Scholarship

2019

Luso International Banking Ltd. Scholarship

2019

Nam Kwong (Group) Company Limited Scholarship

2018
